EXPERIENCE

With over 10 years' experience, United Sleep Apnea Services brings new innovative ways to assist our clients in achieving their goals. We deal with physicians internally and externally through an integrated approach to identify factors that can affect sleep. The hormone/body homeostasis which is a huge contribution in today's society that is overwhelming the healthcare industry. Our products and services follow strict guidelines designed around helping the end user and the success they receive through using them.

United Sleep Apnea Services looks at the mission of our external clients and their goals so that we can align with them to assist in helping reach those goals. Through our constant staff education and training

United Sleep Apnea Services' mission is to align ourselves with your interests, so that we build a lasting and growing relationship. Through our ability to keep a balanced focus through company strategies, we are able to stay client needs driven by improving our operations and in turn accomplishing your needs.

Differentiators

Our company focuses on building the right team to achieve our goals. As a Veteran employment platform, we have built a strong team from both government and civilian sectors that understand the requirements of our customers, and that are able to provide high quality, comprehensive, reliable and cost-effective deliverables that meet your needs. We are constantly evaluating and evolving our approach to ensure we are using industry leading products and service applications at the highest standards for our customers. We are committed to excellence in everything we do, which is why our customers continually come to us for their healthcare needs.

- Close relationships with our vendors for reliable up to date understanding of their needs.
- Experience Project Managers and Team within the government sector.
- Documented quality and control program and pre-shipment quality and control program for all goods and services.
- Fast response to inquiries and needs of our vendors to ensure their services are not delayed to the end user.
